

Mystery: *What were the causes of anthrax in the sheep Pasteur studied on the farm?*

Sheep were herded too closely together

Anthrax bacteria existed

Farmers buried diseased sheep in the same field as live ones

Grass existed

The sheep were not healthy

Worms ate dead animals

Living things exist

Anthrax bacteria multiplied very quickly

The earth exists

Sheep were killed for humans to eat

Pasteur injected some sheep with anthrax

Sheeps' veins were not big enough

Sheep were not vaccinated

Anthrax bacteria got into the sheeps' bloodstream

Farmers didn't care for their sheep

Sheep have wool

Worms carried blood from dead animals to live ones

Farmers lost money when sheep died

Sheep had cuts and scratches

Sheep ate infected grass

Sheeps' arteries and veins got blocked

Blood travelled around sheep's bodies

Anthrax was a killer disease

Some animal had anthrax in the first place
